

How LECOM PCSP works.

LECOM uses its experience with innovative teaching pathways to ensure that Primary Care Scholars receive the equivalent of four years of academic and clinical education to prepare for post-graduate training.

Following unique courses and learning modules, students complete the first two years of basic science and preclinical education in under 20 months. They begin clinical training in March of Year 2. Students must complete core competency-based clinical rotations that meet all the educational requirements necessary for primary care medicine. LECOM has introduced new core rotations to continue OMM necessary for primary care medicine. LECOM has introduced new core rotations to continue OMM training and other essential medical skills. A sub-internship introduces students to the hospitals where they will continue their clinical training after graduation.

Clinical rotations at local teaching hospitals to provide added support for PCSP students: Millcreek Community Hospital, St. Vincent Health Center, Hamot Medical Center, Meadville Medical Center, and UHHS – Richmond Heights

Encourage choice of residency programs at participating UME hospitals

Combine residency studies with Master in Science Program (Medical Education)

Highlights OMM via new clinical rotation

Capstone experiences throughout 3rd and 4th OMS year clinical rotations

Linkage with GME programs in primary care via clinical rotations and sub-internship

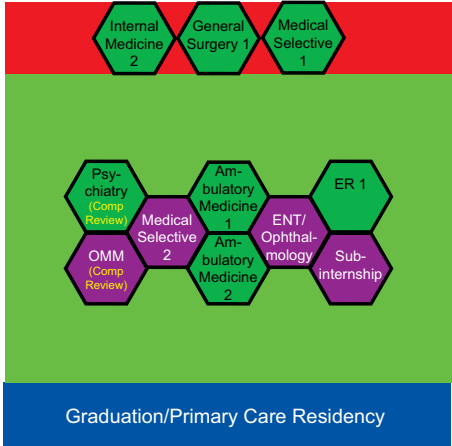

| | Courses | Modules |
|-----------|---|------------------------|
| August | Gross Anatomy | Physiology |
| September | Histology | Biochemistry |
| October | Embryology | Microbiology |
| November | Osteopathic Principles and Practice | Pharmacology |
| December | Medical Ethics/Spirituality | Pathology |
| January | Healthcare Management | Molecular Genetics |
| February | History and Physical Examination | Immunology |
| March | Osteopathic Preceptor Education Project | Integumentary System |
| April | | Musculoskeletal System |
| May | | Nervous System |
| June | Osteopathic Principles and Practice | Digestive System |
| July | CODA | Hematology/Oncology |

PCSP YEAR 1

| Courses | Modules |
|-------------------------------------|---------------------|
| Osteopathic Principles and Practice | Cardiology |
| CODA | Respiratory |
| Public Health | Renal |
| Medical Jurisprudence | Geriatrics |
| Board Review | Human Sexuality |
| Psychiatry | Pediatrics |
| ACLS | Reproductive System |
| | Endocrinology |
